

What is the proper way to clean snow out of my driveway?

DO NOT shovel, plow, or blow snow into the street. This is against the law. Individuals who place snow in the street make it more difficult to clear the street. It also creates ice hazards as other vehicles drive over the snow and compact it.

The best method is to wait to clean snow out of your driveway and mailbox until after the plow has cleared the street curb to curb. The plow may come through several times before completion.
